Ethiopia

Attachment 7
WG 2 N 2747

Attachment 1 – Canada

"Canada accepts the text of the PDAM1 as written. Also Canada requests that the following proposed additions to be approved by WG2 and included in this amendment before it progresses to the next stage:

JTC1/SC2/WG2 N2739, a joint Morocco-Canada-France proposal to add Tifinagh script

JTC1/SC2/WG2/N2738 - proposal to add Roman Numeral Canopy character

China votes NO to ISO/IEC JTC 1/SC 2 N 3714

General comments:

1. China opposes to encode those scripts less alive than Tibetan BrdaRten into BMP.
2. China would like help ISO/IEC 10646 project editor to prepare next version of Tai Lue (current 1980-19DF) and Phags-pa (current A840-A87F) for ballot.

Technical comments:

Tai Lue:

1. The Tai Lue scripts are being widely used among Dai people in China. Therefore the encoded Tai Lue scripts should be accepted by Chinese Dai experts and the users.
2. The New Tai Lue scripts had been standardized when it was improved in 1950's. And the writing rule and spelling rule was set then. All kinds of Tai Lue fonts being used should follow the rule.
3. We disagree on the ordering of Tai Lue characters in N3696. The Tai Lue characters should be listed in the order as the following: consonants, monophthongs, diphthongs, syllable-final consonants, tone marks, digits and the other marks.
 - A. Ordering of articulation. The consonants are ordered according to several properties in Dai tradition.
 - Point of articulation: glottal, velar, apical, labial.
 - Manner of articulation: plosive (unaspirated, aspirated), affricate (unaspirated, aspirated), nasal, fricative, semi-vowel.
 - Tone class: high, lowThe traditional way of ordering the consonants is divided the 42 consonants into 8 groups according to the point of articulation at first. The consonants among each group are ordered according to the manner of articulation. At last, the consonants are ordered according to the tone class. The group of consonants with high tone is listed before the group of consonants with low tone.
 - B. Ordering of vowels. The vowels are ordered in the turn of single vowels, diphthongs and syllable-final consonants. The vowels can be put before or after a consonant in a syllable, but the syllable-final consonants should be after any consonant and vowel.
 - C. The ordering of other characters. The tone mark is ordered after the vowel. Then come the digits listed as 0,1,2,3,4,5,6,7,8,9. The last three are the particle mark (i.e., the 19DE in N3696),superjoin mark and subjoin mark.
4. We prefer to encode the Tai Lue characters in N3696, of which the numbers are: 1981, 199C, 19A3, 19A5, 19A6, 19A7, 19A8, 19A9, 19DF in separate way. That's more appropriate.
5. The encoding of Tai Lue vowel in N3696 is not consistent. Some of them is encoded separately, e.g., the vowel [↔] is encoded combining 19C1 and 19B1, while the diphthong [↔i] is encoded combining 19C1 and 19CC.
6. The Tai Lue character 19C2 in the list of Tai Lue name is wrong.

Phags-pa

1. Alphabet not integrated, 2 vowels ö and ü used for recording Mongolian missing.
2. Some presentation forms are regarded as cononical forms by error, e.g., A868 and A869 are presentation forms A85C, they should not be placed at current locations.
3. Letters sorting wrong. For instance: AB68, AB69, AB6A, AB6B, A862, A863, A864, A865.

4. Typeface in this PDAM had never been used in history of Phags-pa script.
5. Some characters' shapes are not the best choice for cononical characters, shapes selected should be thoes appear frequently. For instance: A851 and A86C.
6. Character names should conform to that of Mongolian (1800-18AF). For instance: A86F ANUSVARA, A870 BIRGA, etc..
7. At least one "Free Variation Form Selector" is needed. A "Syllable Connector" different to "general space" is also needed.
8. Phags-pa script shoud not be regarded as variant of Tibetan script.

Attachment 3 – France

The French national body vote yes to the PDAM, amendment 1 of ISO/CEI 10646:2003. Additionally AFNOR recommends the inclusion in this amendment discussion in Markham of the joint Morocco-Canada-France proposal to add Tifinagh to ISO/IEC 10646 (attached document N **2739**).

Such decision would help to fasten appropriate satisfaction of important user's needs as shown in the proposed document.

Irish comments on PDAM-1 for ISO/IEC 10646:2003

Reference: SC2 N3714

Closes: 2004-05-04

Date: 2002-05-03

Ireland **disapproves** the draft with the technical and editorial comments given below. Acceptance of these comments and appropriate changes to the text will change our vote to approval.

Technical comments

- T1. **Page 2, Clause Terms and definitions.** The definition given here is technically imprecise. The “i” in the ligature “fi” may graphically combine with the “f” but that does not mean that “f” is the base character for “i”. Compare Devanagari and Arabic scripts. This definition should be corrected by WG2 or the definition should be deleted from the PDAM.
- T2. **Page 1349, Annex A.1.** Ireland requests that the Coptic block be extended to 2CFF. See T18 below.
- T3. **Page 1352, Annex A.2.1.** Ireland requests that the Coptic block be extended to 2CFF. See T18 below.
- T4. **0238 LATIN SMALL LETTER TH WITH STRIKETHROUGH:** Ireland would support the removal of this character from the PDAM pending further study of it and similar phonetic ligatures. We do not, however, insist on this point. At the very least it ought to be moved to 1D7A with other phonetic characters.
- T5. **03FD REVERSED GREEK CAPITAL LUNATE SIGMA SYMBOL.** This character must be renamed GREEK CAPITAL REVERSED LUNATE SIGMA SYMBOL to be in accord with the usual naming conventions for Greek.
- T6. **03FE DOTTED GREEK CAPITAL LUNATE SIGMA SYMBOL.** This character must be renamed GREEK CAPITAL DOTTED LUNATE SIGMA SYMBOL to be in accord with the usual naming conventions for Greek.
- T7. **03FF REVERSED DOTTED GREEK CAPITAL LUNATE SIGMA SYMBOL.** This character must be renamed GREEK CAPITAL REVERSED DOTTED LUNATE SIGMA SYMBOL to be in accord with the usual naming conventions for Greek.
- T8. **0767 ARABIC LETTER NOON WITH TWO DOTS BELOW AND DOT ABOVE.** This character must be renamed ARABIC LETTER NOON WITH TWO DOTS BELOW to be in accord with the usual naming conventions for Arabic. The “dot above” here is an intrinsic feature of the NOON itself and should not be part of the character name.
- T9. **0767 ARABIC LETTER NOON WITH DOT ABOVE AND SMALL TAH.** This character must be renamed ARABIC LETTER NOON WITH SMALL TAH to be in accord with the usual naming conventions for Arabic. The “dot above” here is an intrinsic feature of the NOON itself and should not be part of the character name.
- T10. **097D DEVANAGARI GLOTTAL STOP.** This character must be renamed DEVANAGARI LETTER GLOTTAL STOP to be in accord with the usual naming conventions for Devanagari. The character is used as a letter.
- T11. **TABLE 57 - Row 19: Tai Lue.** With reference to ISO/IEC JTC1/SC2/WG2 N2748 “Proposal on encoding New Tai Lue”, Ireland rejects the changes proposed in that document. That new Chinese proposal requests the deletion of 11 characters, nine of which are intended to be composed using two combining diacritical marks proposed for addition. This is a reversal from the consensus on encoding

arrived at between the Chinese, Irish, and U.S. representatives who met to discuss Tai Lue at the Dublin meeting of WG2 in 2002. Further, if such a change were made, then it would be reasonable to suggest that the letters 1986, 1992, 1998, and 199E should also be decomposed to TAI LUE LETTER HIGH HA plus a set of subscripts, or that the Virama-model which was rejected for this script be reintroduced. N2748 proposes to encode TAI LUE LETTER VOWEL SIGN E as a sequence of TAI LUE LETTER VOWEL SIGN EE and TAI LUE LETTER VOWEL SIGN EE, which introduces inconsistency in the encoding model. Ireland also rejects the reorganization of the order of the characters in the code chart; we believe that the ordering of the consonants there reflects the ordering as actually presented in dictionaries (we will verify this before the WG2 meeting in Markham). Finally, N2748 proposes the unification of TAI LUE DIGIT ZERO and TAI LUE LETTER LOW VA, which is unacceptable. Ireland supports the Tai Lue encoding as given in the PDAM.

T12. **1D79 LATIN LETTER INSULAR G.** This character must be renamed LATIN SMALL LETTER INSULAR G to be in accord with the usual naming conventions for Latin.

T13. **TABLE 68 - Row 20: Currency Symbols.** With reference to ISO/IEC JTC1/SC2/WG2 N2743 "Proposal to encode the HRYVNIA SIGN and the CEDI SIGN in the UCS", Ireland requests the addition of the two currency signs HRYVNIA SIGN and CEDI SIGN at positions 20B4 and 20B5.

T14. **2692 HAMMER AND CHISEL.** The name should be changed to the more accurate HAMMER AND PICK.

T15. **2695 ROD OF AESCLEPIUS.** The name of this son of Apollo is Aesculapius, though other spellings are found; interestingly, he is referenced in the Hippocratic Oath. The character name should be changed to STAFF OF AESCULAPIUS (STAFF, ROD, and WAND are all found, but a long walking-stick or staff is most common in the icons we have seen). The reference glyph for this character should not be set at an angle, but should be vertical like the related CADUCEUS; the angled glyph seems to be a peculiar use of one dictionary. We are prepared to provide a better glyph to the editor.

T16. **269A STAFF OF HERMES.** Ireland requests the removal of this character until further evidence can be found. We find that the Staff of Hermes = the Caduceus, and cannot find authoritative evidence for the winged staff in any context *without* the two snakes.

T17. **TABLE 97 - Row 2C: Glagolitic.** Ralph Cleminson, one of the authors of the Glagolitic proposal, has pointed out that Glagolitic requires a single combining mark, which was omitted from the original proposal: the COMBINING GLAGOLITIC SUSPENSION MARK, which looks a bit like an inverted COMBINING CYRILLIC TITLO (which is also used in Glagolitic). We request that this character be added to the PDAM, and suggest either one of the empty positions in the Glagolitic table or perhaps better 0487 in the Cyrillic block. An illustration of a manuscript containing numerous examples of the SUSPENSION MARK is appended to the end of this document. In addition to this, five character of the Glagolitic names need to be replaced with the following:

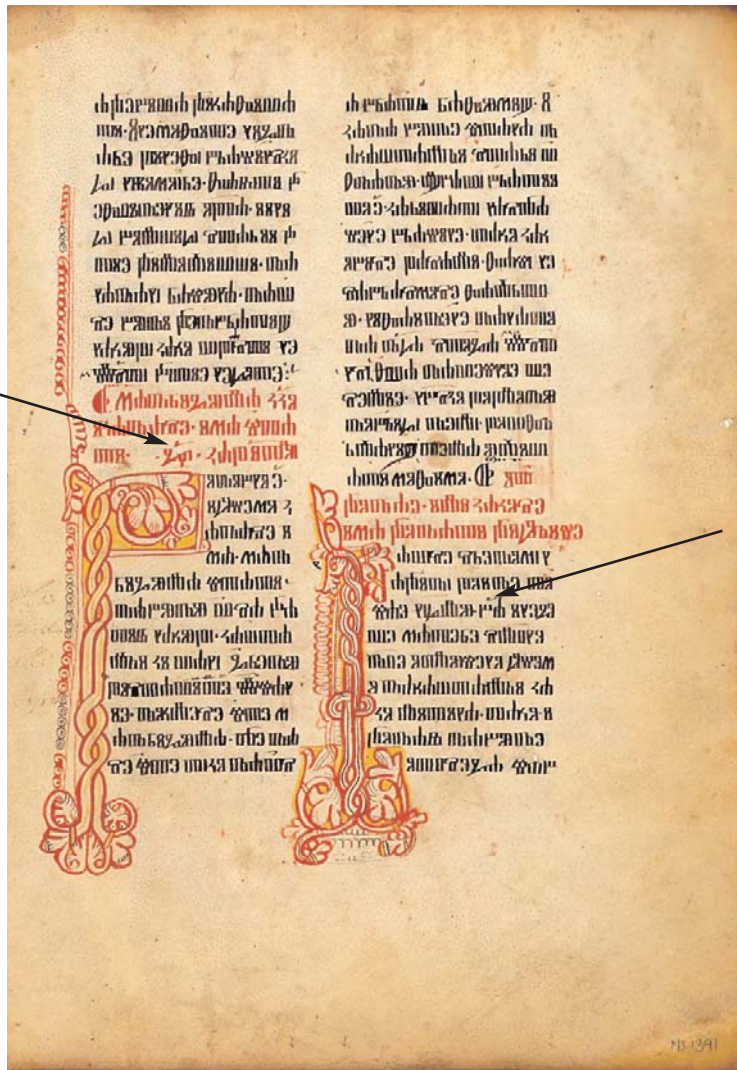

2C0C GLAGOLITIC CAPITAL LETTER DJERVI
 2C23 GLAGOLITIC CAPITAL LETTER YU
 2C2D GLAGOLITIC CAPITAL LETTER TROKUSTASTI A
 2C3C GLAGOLITIC SMALL LETTER DJERVI
 2C2D GLAGOLITIC SMALL LETTER TROKUSTASTI A.

T18. **TABLE 98 - Row 2C: Coptic.** With reference to ISO/IEC JTC1/SC2/WG2 N2744, "Revision of the Coptic block under ballot for the BMP of the UCS", Ireland requests the complete replacement of the Coptic chart and names list given in the PDAM, and the extension of the Coptic block to 2CFF. The table is also given below.

- T19. **TABLE 127 - Row A8: Phags-pa.** With reference to ISO/IEC JTC1/SC2/WG2 N2745, “Summary of the 1st Joint Meeting on the HPhags-Pa Script Encoding”, Ireland rejects the changes proposed in that document. The document deletes A868, A869, A870, A871, A872, and A873 without discussion, adds four punctuation characters which appear to be duplicates of Mongolian characters, adds two vowels which can each be rendered as strings of other characters in the proposal, adds an unnecessary glyph joiner, and duplicates four characters stating that distinct uses are made of some of these to represent some sounds on the Chinese language – which may be true, but the sounds are not described, nor is any evidence shown of the use of the characters distinctively in text. Finally, N2745 renames the Phags-Pa characters by adding unnecessary language identifiers throughout. Ireland supports the Phags-Pa encoding as given in the PDAM.
- T20. **Additional Phonetic Symbols.** With reference to ISO/IEC JTC1/SC2/WG2 N2705 “Proposal to encode five Indo-Europeanist phonetic characters in the UCS”, Ireland requests the addition of the characters LATIN SUBSCRIPT SMALL LETTER A, LATIN SUBSCRIPT SMALL LETTER E, LATIN SUBSCRIPT SMALL LETTER O, and LATIN SUBSCRIPT SMALL LETTER X at suitable positions, as well as SUBSCRIPT SOLIDUS at position 208F.
- T21. **COMBINING RIGHT DOT ABOVE.** With reference to ISO/IEC JTC1/SC2/WG2 N2628 “Proposal to add COMBINING RIGHT DOT ABOVE as required by Taiwanese Holo language Romanization to ISO/IEC 10646”, as well as with reference to the 1997 document N1593 which requests the same character, Ireland requests the addition of COMBINING RIGHT DOT ABOVE at position 0358.
- T22. **Hebrew Characters.** With reference to ISO/IEC JTC1/SC2/WG2 N2692 “Proposal to add ATNAH HAFUKH to the BMP of the UCS”, to ISO/IEC JTC1/SC2/WG2 N2714 “Proposal to add two Masoretic punctuation marks to the BMP of the UCS”, and to ISO/IEC JTC1/SC2/WG2 N2755 “Proposal to add QAMATS QATAN to the BMP of the UCS”, Ireland requests the addition of the following: HEBREW ACCENT ATNAH HAFUKH at position 05A2 (with the glyph change of 05AA as shown in N2693), HEBREW MARK LOWER DOT at position 05C5, and HEBREW PUNCTUATION NUN HAFUKHA at position 05C6, and HEBREW POINT QAMATS QATAN at position 05BA.
- T23. **Bhutanese Symbols.** With reference to ISO/IEC JTC1/SC2/WG2 N2694 “Proposal to encode two Bhutanese marks for Dzongkha in the UCS”, Ireland requests the addition of the two punctuation signs TIBETAN MARK BSKA- SHOG GI MGO RGYAN (ka shog gi go gyen) and TIBETAN MARK MNYAM YIG GI MGO RGYAN (nyam yig gi go gyen) at positions 0FD0 and 0FD1.

Editorial comments

- E1. **Page 2, Clause Terms and definitions.** Change “number” to “numbers”.
- E2. **Page 15, Sub-clause 20.4 Variation selectors.** Change “non base” to “non-base”.
- E3. **Table 9 - Row 03: Combining Diacritical Marks.** The glyph for 031A is missing.
- E4. **Table 10 - Row 03: Greek and Coptic.** Replace the Coptic glyphs for 03E2-03EF with the glyphs as shown in ISO/IEC JTC1/SC2/WG2 N2744 and in the table below.
- E5. **Table 19 - Row 07: Arabic Supplement.** The glyphs for 075B and 076A have contour errors. The crossbars must be merged with the REH and LAM outlines.

Attachment 5 – Morocco

Please find enclosed The Moroccan ballot form about the document N3714 - ISO/IEC 10646: 2003/Amd 1, Information technology - Universal Multiple-Octet Coded Character Set (UCS) - AMDNDMENT 1: Glagolitic, Coptic, Georgian and other characters.

Moroccan comments consist on the addition of the Tifinaghe characters to the ISO/IEC 10646:2003. Please see the attached document N2739 or the link

<http://anubis.dkuug.dk/JTC1/SC2/WG2/latestdocs.html>

Best regards.

**A. TAIBI
SNIMA/MOROCCO**

Date: April 30, 2004

Title:	Comments accompanying the US positive vote on the PDAM1 to ISO/IEC 10646:2003		
Source:	US	National	Body
Action:	Forward to INCITS		

The US National body is voting Yes on the PDAM1 to ISO/IEC 10646:2003.

Technical Comments:

T.1 Latin Extended-B

Move the newly proposed U+0238 LATIN SMALL LETTER TH WITH STRIKETHROUGH to U+1D7A. Rationale: it is more appropriate to encode it with other phonetic extensions

T.2 Ideographic Character

The US is supporting the glyph change requested by document IRG N1026 for the character U+21E45 from  to . It should be noted that the 'new' glyph would be identical to the one shown by ISO/IEC 10646-2:2001 before its first amendment was applied to it. There is no change to the CJK source reference as a result of this glyph change.

T.3 Annex E Mirrored characters in bidirectional context

With the successive amendments it is obvious that the character list in E.1 Mathematical symbols (renamed 'Mathematical symbols and paired characters' by this amendment) has not been kept up to date. The best source should be the Unicode file BidiMirroring-4.0.0.txt, source: <http://www.unicode.org/Public/4.0-Update/BidiMirroring-4.0.0.txt> maintained by the Unicode Consortium. With the normative reference made by ISO/IEC 10646 to UAX#9 (Unicode Bidi Algorithm), it is important to keep these name lists synchronized. Annex E needs to be revised to be consistent with the file mentioned above.

T.4 HKSCS-2001

According to <http://www.info.gov.hk/digital21/eng/hkscs/download/big5-iso.txt> there are a large number of HKSCS-2001 characters still encoded in the Private Use Area (PUA). The following table shows the currently used PUA codes, the glyphs and proposed code allocation (as of now). The proposed code shows as a 4-5 digit hex code (already encoded as single character), a UCS Sequence Identifier or a 'C-xxxx' sequence indicating planned allocation for CJK Extension C. When no proposed code exists, a question mark is displayed. Given the facts that PUA usage is far from optimal for widely used repertoire and that the CJK Extension C is not yet mature, the US is in favor of accelerating the encoding of these characters by adding them in this amendment using the following categorization:

- A new block containing Unified CJK Basic Stroke types
- Additional symbols (Miscellaneous Technical block)
- CJK Unified Ideographs

(The shaded area in the glyph cells shows the character bounding box)

HKSCS Code	PUA Code	Glyph	Proposed Code	Comment
8840	F303	✓	C-0001	xx00 Unified CJK Basic Stroke
8841	F304	丿	C-0518	xx01 Unified CJK Basic Stroke
8842	F305	㇀	C-0519	xx02 Unified CJK Basic Stroke
8843	F306	㇁	C-0520	xx03 Unified CJK Basic Stroke
8844	F307	㇂	?	xx04 Unified CJK Basic Stroke
8846	F309	㇃	C-0400	xx05 Unified CJK Basic Stroke
8849	F30C	㇄	?	xx06 Unified CJK Basic Stroke HC87A already maps to similarly shaped U+200CC
884A	F30D	㇅	C-0402	xx07 Unified CJK Basic Stroke
884D	F310	㇆	C-0399	xx08 Unified CJK Basic Stroke
884F	F312	㇇	C-0403	xx09 Unified CJK Basic Stroke

8CC0	F5D5	鋼	C-21171	9FAC CJK Unified Ideographs

8CD7	F5EC	騏	C-22927	9FAD CJK Unified Ideographs
8CD8	F5ED	騏	C-22952	9FAE CJK Unified Ideographs
8CDA	F5EF	鉞	C-21016	9FAF CJK Unified Ideographs
C879	F7E5	乚	C-0211	xx0F Unified CJK Basic Stroke
C87E	F7EA	𠂇	4491	Already encoded as CJK Unified Ideograph (grass radical) looks like a mapping oversight
C8A1	F7EB	止	C-3309	4DB6 CJK Unified Ideographs
C8A3	F7ED	𠂇	C-5373	4DB7 CJK Unified Ideographs

It should be noted that a similar situation exists for GB18030 where many characters are also encoded in the PUA area, it could be beneficial to address both issues (HKSCS and GB18030) at the same time. For reference the following table shows these PUA characters:

GB18030 Code	PUA Code	Glyph	Proposed Code	Comment
A6D9	E78D	’	?	
A6DA	E78E	◦	?	Vertical variant of U+3002 ◦
A6DB	E78F	、	?	Vertical variant of U+3001 、
A6DC	E790	⋮	?	
A6DD	E791	⋮	?	
A6DE	E792	!	?	
A6DF	E793	?	?	
A6EC	E794	⌈	?	Vertical variant of U+3016 ⌈
A6ED	E795	⌋	?	Vertical variant of U+3017 ⌋
A6F3	E796	⋮	?	Vertical ellipsis, but can't use U+22EE as it does not decompose in <vertical>U+2026
A8BC	E7C7	𠂇	1E3F	
FE51	E816	ナ	20087	
FE52	E817	ナ	20089	
FE53	E818	ナ	200CC	
FE59	E81E	マ	?	
FE61	E826	手	?	
FE66	E82B	止	?	
FE67	E82C	止	?	Exists as proposed C-0537
FE6C	E831	𠂇	215D7	

FE6D	E832	𠄎	?	
FE76	E83B	𠄎	2298F	
FE7E	E843	𠄎	20509	
FE90	E854	𠄎	2099D	
FE91	E855	𠄎	241FE	
FEA0	E864	𠄎	?	Similar to U+470C 𠄎 but as high half component could be added as a CJK Compatibility Ideograph

T.5 Phonetic symbols

a) The proposed character at position 1D79 should be renamed as follows ('small' inserted):

1D79 LATIN SMALL LETTER INSULAR G

b) To complete the phonetic symbols repertoire the US is requesting the addition of the following characters:

PHONETIC EXTENSION (existing block)

1D7B LATIN SMALL CAPITAL LETTER I WITH STROKE
1D7C LATIN SMALL LETTER IOTA WITH STROKE
1D7D LATIN SMALL LETTER P WITH STROKE
1D7E LATIN SMALL CAPITAL LETTER U WITH STROKE
1D7F LATIN SMALL LETTER UPSILON WITH STROKE

New block extending the Phonetic symbols (block name to be determined)

1D80 LATIN SMALL LETTER B WITH PALATAL HOOK
1D81 LATIN SMALL LETTER D WITH PALATAL HOOK
1D82 LATIN SMALL LETTER F WITH PALATAL HOOK
1D83 LATIN SMALL LETTER G WITH PALATAL HOOK
1D84 LATIN SMALL LETTER K WITH PALATAL HOOK
1D85 LATIN SMALL LETTER L WITH PALATAL HOOK
1D86 LATIN SMALL LETTER M WITH PALATAL HOOK
1D87 LATIN SMALL LETTER N WITH PALATAL HOOK
1D88 LATIN SMALL LETTER P WITH PALATAL HOOK
1D89 LATIN SMALL LETTER R WITH PALATAL HOOK
1D8A LATIN SMALL LETTER S WITH PALATAL HOOK
1D8B LATIN SMALL LETTER ESH WITH PALATAL HOOK
1D8C LATIN SMALL LETTER V WITH PALATAL HOOK
1D8D LATIN SMALL LETTER X WITH PALATAL HOOK
1D8E LATIN SMALL LETTER Z WITH PALATAL HOOK
1D8F LATIN SMALL LETTER A WITH RETROFLEX HOOK

1D90 LATIN SMALL LETTER ALPHA WITH RETROFLEX HOOK
1D91 LATIN SMALL LETTER D WITH HOOK AND TAIL
1D92 LATIN SMALL LETTER E WITH RETROFLEX HOOK
1D93 LATIN SMALL LETTER OPEN E WITH RETROFLEX HOOK
1D94 LATIN SMALL LETTER REVERSED OPEN E WITH RETROFLEX HOOK
1D95 LATIN SMALL LETTER SCHWA WITH RETROFLEX HOOK
1D96 LATIN SMALL LETTER I WITH RETROFLEX HOOK
1D97 LATIN SMALL LETTER OPEN O WITH RETROFLEX HOOK
1D98 LATIN SMALL LETTER ESH WITH RETROFLEX HOOK
1D99 LATIN SMALL LETTER U WITH RETROFLEX HOOK
1D9A LATIN SMALL LETTER EZH WITH RETROFLEX HOOK
1D9B MODIFIER LETTER SMALL TURNED ALPHA
1D9C MODIFIER LETTER SMALL C
1D9D MODIFIER LETTER SMALL C WITH CURL
1D9E MODIFIER LETTER SMALL ETH
1D9F MODIFIER LETTER SMALL REVERSED OPEN E

1DA0 MODIFIER LETTER SMALL F
1DA1 MODIFIER LETTER SMALL DOTLESS J WITH STROKE
1DA2 MODIFIER LETTER SMALL SCRIPT G

IDA3 MODIFIER LETTER SMALL TURNED H
IDA4 MODIFIER LETTER SMALL I WITH STROKE
IDA5 MODIFIER LETTER SMALL IOTA
IDA6 MODIFIER LETTER SMALL CAPITAL I
IDA7 MODIFIER LETTER SMALL CAPITAL I WITH STROKE
IDA8 MODIFIER LETTER SMALL J WITH CROSSED-TAIL
IDA9 MODIFIER LETTER SMALL L WITH RETROFLEX HOOK
IDAA MODIFIER LETTER SMALL L WITH PALATAL HOOK
IDAB MODIFIER LETTER SMALL CAPITAL L
IDAC MODIFIER LETTER SMALL M WITH HOOK
IDAD MODIFIER LETTER SMALL TURNED M WITH LONG LEG
IDAE MODIFIER LETTER SMALL N WITH LEFT HOOK
IDAF MODIFIER LETTER SMALL N WITH RETROFLEX HOOK

IDB0 MODIFIER LETTER SMALL CAPITAL N
IDB1 MODIFIER LETTER SMALL BARRED O
IDB2 MODIFIER LETTER SMALL PHI
IDB3 MODIFIER LETTER SMALL S WITH HOOK
IDB4 MODIFIER LETTER SMALL ESH
IDB5 MODIFIER LETTER SMALL T WITH PALATAL HOOK
IDB6 MODIFIER LETTER SMALL U BAR
IDB7 MODIFIER LETTER SMALL UPSILON
IDB8 MODIFIER LETTER SMALL CAPITAL U
IDB9 MODIFIER LETTER SMALL V WITH HOOK
IDBA MODIFIER LETTER SMALL TURNED V
IDBB MODIFIER LETTER SMALL Z
IDBC MODIFIER LETTER SMALL Z WITH RETROFLEX HOOK
IDBD MODIFIER LETTER SMALL Z WITH CURL
IDBE MODIFIER LETTER SMALL EZH
IDBF MODIFIER LETTER SMALL THETA

IDC2 COMBINING SNAKE BELOW

LATIN EXTENDED-B (existing block)

0238 LATIN SMALL LETTER DB DIGRAPH
0239 LATIN SMALL LETTER QP DIGRAPH
023A LATIN SMALL LETTER C WITH STROKE

The complete character proposal is WG2 N2740.

T.6 Annex L Character naming guidelines

To correct the discrepancy between the introduction of the Phags-Pa character names and the naming guidelines, the US is asking the following changes to Annex L, Rule 4.

- First paragraph add ‘medial’ before the term ‘HYPHEN-MINUS’,
- In paragraph starting with ‘The following six character’, replace ‘six’ by two,
- Remove the first 4 entries, preserving the two Hangul entries.

T.7 Coptic

a) The following characters should be removed unless further evidence is found.

2C99 COPTIC CAPITAL LETTER AKHMIMIC KHEI and

2C9A COPTIC CAPITAL LETTER RO WITH STROKE

Rationale: Because 2C99 is not a Bohairic character, and because 2C9A is a non-alphabetic character, neither one occurs in upper-case (capital) form.

b) The character 2CBD COPTIC SYMBOL KHRISTOS should be renamed COPTIC SYMBOL STAUROS.

Rationale: The illustration for this character is not a symbol for *khristos* “Christ”, as the character name would seem to indicate, but rather for *stauros* “cross”.

T.8 Glagolitic

The following character names need to be revised as follows.

2C0C GLAGOLITIC CAPITAL LETTER DJERVI

2C23 GLAGOLITIC CAPITAL LETTER YU

2C2D GLAGOLITIC CAPITAL LETTER TROKUSTASTI A
2C3C GLAGOLITIC SMALL LETTER DJERVI
2C5D GLAGOLITIC SMALL LETTER TROKUSTASTI A

T.9 Ancient Greek Numbers

The proposed block has no codepoint for ‘zero’ among the Greek symbols. This symbol occurs notably whenever a sexagesimal notation is used in astronomical texts to record degrees, minutes and seconds, or hours minutes and seconds, suggested new glyph at location 1018A:

1018A GREEK ZERO SIGN

The US is in support of adding that character as proposed by the document WG2 N 2708

T.10 Miscellaneous Mathematical

a) The proposed character at position 2692 should be renamed as follows:

2692 HAMMER AND PICK

b) In support of WG2 N2680, the US is asking for the addition of the following mathematical symbols with glyphs as described in the document:

27C3 OPEN SUPERSET
27C4 OPEN SUBSET
27C5 LEFT S-SHAPED BAG DELIMITER
27C6 RIGHT S-SHAPED BAG DELIMITER

Note: the two first names differ from the proposal by having ‘OPEN’ instead of ‘BOUNDED’.

T.11 New Arabic characters

The US is requesting the encoding the following 5 Arabic characters as supported by document WG2 N2723 (UTC/L2 L04-25) in the following blocks:

ARABIC

065D ARABIC REVERSED DAMMA
065E ARABIC FATHA WITH TWO DOTS

ARABIC SUPPLEMENT

076B ARABIC LETTER REH WITH TWO DOTS VERTICALLY ABOVE
076C ARABIC LETTER REH WITH HAMZA ABOVE
076D ARABIC LETTER SEEN WITH TWO DOTS VERTICALLY ABOVE

T.12 Tamil

The US is requesting the encoding the following Tamil character as supported by document WG2 N2741 (UTC/L2 L04-73) in the Tamil block:

0BE6 TAMIL DIGIT ZERO

T.13 Alternate Format Characters

With respect to the issues raised in document WG2 N2648, author V.S. Umamaheswaran, the US suggests the addition of a formal definition for Alternate Format Characters in clause 4 and would support a clarification concerning these characters as described in clause 20.3 and Annex F. The US would welcome such clarification in this PDAM text.

T.14 JIS-x-213 source reference

JIS-x-213 has been revised with new CJK source references; this should be added to the appropriate CJK source files.

T.15 Tai Lue

The US requests WG2 to make sure the ordering of the Tai Lue block respects a traditional order.

Editorial Comments:

E.1 Chart page 8, Table 9 Row 3

Glyph production error in cell U+031A (not a new character). A part of the glyph shows as a rectangle instead as of an angle.

End of US comments

Attachment 7 – Ethiopia

Greetings Ms Kimura,

Concerning the FPDAM ballot for SC2N3714; the Quality and Standards Authority of Ethiopia is in agreement with the general and technical aspects of the amendment proposal as it addresses the orthographies of other member bodies. Under Clause 33, however, we are concerned that consideration has not been given for inclusion of Extended Ethiopic elements found in the Ethiopian national character set standard of 2002. Attached to this email is a request for inclusion of Extended Ethiopic elements into Amendment 1 of ISO/IEC 10646:2003 derived from our national character set standard ES 781:2002.

The QSAE thanks the Secretariat and the distinguished members of the WG2 for consideration of this request.

Sincerely,

Mesfin Teklehaimanot
A/Director, Standards and Metrology
QSAE

Subject : Ballot on Draft amendment of the ISO/IEC 10646/2003 related to the universal characters codes .

Dear Sir ,

We would like to inform you that INORPI approve the ISO/IEC 10646 amendment but, considering the importance of the efforts begun by the Moroccan authorities for the protection of the amazigh language, and considering the necessity to allow and strengthen the development of the amazigh educative programs .

INORPI recommends the integration of the tifighane coded character in the project of amendment, as developed by the Institut royal de la Culture Amazighe (IRCAM).

Amor CHIBANI

INORPI
