A reference font containing these images will be made available by the submitters.

Usage

The character COMBINING ENCLOSING KEYCAP is intended to be used in conjunction with any base character (including symbols) to indicate to a user, e.g. in a manual or in on-screen instructions, which key to press to enter the character or symbol in question.

The character COMBINING ENCLOSING SCREEN is intended to be used in conjunction with appropriate symbols where a shape surrounded by a screen is intended.

The user community includes computer and software manufacturers as well as editors and publishers of computer and software manuals.
