Title: Request for five Yi radicals missing from the UCS

Source: Ireland

Date: 2000-03-18

Five Yi radicals present in Bburx 1984:23-24 were omitted from FDAM 14. Space for these radicals was reserved during the disposition of comments on the Irish No vote on FPDAM 14 (SC2 N3215).

Ireland requests that WG2 assign the following characters to the empty spaces in Table 231 of ISO/IEC 10646-1:

	A4A2 YI RADICAL ZUP
	A4A3 YI RADICAL CYT
	A4B4 YI RADICAL NZUP
	A4C1 YI RADICAL ZUR
	A4A2 YI RADICAL NBIE

The base characters these are found with are 𐀀 ZUP, 𐀁 CYT, 𐀂 NZUP, 𐀃 ZUR, and 𐀄 NBIE respectively. A scanned sample from Bburx can be found in SC2 N3268.

We have not supplied a new proposal summary form as we requested the full repertoire of Yi radical characters as early as 1995 (N1187). They are well-known to the UTC and to WG2.
