w.	<i>M47.27 (OI Chiki script):</i> WG2 resolves to encode the OI Chiki script proposed in document N2984 in a new block 1C50--1C7F named ‘OI Chiki’, in a future amendment to the standard, and populate it with forty eight (48) characters with the names, glyphs and code position assignments as shown on pages 11 and 12 in document N2984.	
x.	<i>M47.29 (Amendment 3 – subdivision and PDAM text):</i> WG2 instructs its editor to prepare a project sub division proposal and PDAM text based on the various resolutions from this meeting accepting characters for inclusion in a future amendment to ISO/IEC 10646: 2003, and forward them to the SC2 secretariat for simultaneous ballot of sub division approval and PDAM registration (see documents N2993 and N2999). The proposed completion dates for the progression of this work item are: PDAM 2006-02-15, FPDAM 2006-09-15, and FDAM 2007-02. (Note: A total of 517 characters were accepted for inclusion in Amendment 3 at this meeting). <i>Items AI-47-o through x are all for Amd 3.</i>	
y.	<i>M47.28 (Hangul clarification):</i> With reference to documents N2994 and N2996, WG2 recognizes there is a need for some clarification regarding Hangul syllables and invites interested experts to participate in the discussion. WG2 also instructs its editor to draft appropriate clarification text to address the different items in these documents for further discussion and adding to the agenda for the next meeting.	
AI-47-4	Ad hoc group on principles and procedures (lead - Dr. V.S. UMAheshwaran)	
	<i>To take note of and act upon the following items.</i>	Completed;

Item	Assigned to / action (Reference resolutions in document N2954, and unconfirmed minutes in document N2953 for meeting 47 - this document you are reading)	Status
		see document N3002.
a.	<p><i>M47.1 (Case Folding stability):</i> WG2 acknowledges the need for guaranteeing stability of case folding of characters in scripts having two cases, and accepts to adopt the guidelines in the following text in its principles and procedures:</p> <p><i>Stability of Case Folding</i> For text containing characters from scripts having two cases (bicameral scripts), case folding is an essential ingredient in case-insensitive comparisons. Such comparisons are widely applied, for example in Internationalized Domain name (IDN) lookup, or for identifier matching in case-insensitive programming and mark-up languages. Because such operations require stable identifiers and dependable comparison results it is important that the standard be able to provide the guarantee of complete stability. For historic reasons, and because there are many characters with lowercase forms but no uppercase forms, the case folding is typically done by a <i>lowercasing</i> operation, and this also matches the definition used by the Unicode Standard for <i>case folding</i>.</p> <p>In order to guarantee the case-folding stability, WG2 adopts the following principle when evaluating proposals for encoding characters for bicameral scripts:</p> <p>"Subsequent to the publication of Amendment 2 of ISO/IEC 10646: 2003, if a character already has an uppercase form in the standard but no lowercase form, its corresponding lowercase form can not be added to the standard; the only way a lowercase form can be added, if proved to be absolutely essential, is by entertaining a new pair of uppercase and lowercase forms for encoding. If only a lowercase form exists and an uppercase form is deemed to be needed it can be added without affecting the stability of case folding."</p>	
b.	<p><i>M47.2 (Combining diacritic marks):</i> With reference to documents N2976 and N2978, WG2 acknowledges the need for additional guidelines when considering generic diacritical marks that may be used across different scripts, and accepts the text proposed in document N2978 as additional guidelines for inclusion in its principles and procedures.</p>	
c.	<p><i>M47.3 (Adding to FDAM):</i> With reference to document N2997, WG2 acknowledges the need for additional guidelines on handling requests with some urgency in providing solutions, and accepts the text proposed in document N2997, modified per discussions at M47, for inclusion in its principles and procedures.</p> <p><i>Note: the second reference to document N2997 was erroneously recorded as N2987 in the approved resolution document N2954.</i></p>	
d.	<p><i>M47.4 (Disunification, Stability of Identifiers):</i> With reference to document N2987, WG2 accepts the text proposed in document N2987, modified per discussions at M47, for inclusion in its principles and procedures.</p>	
e.	<p><i>M47.36 (Principles and procedures):</i> WG2 accepts the draft updates to its principles and procedures as presented in document N2952 and instructs its convener to post a revised document N3002 based on discussions at M47 and the proposal summary form to the WG2 web site.</p>	
AI-47-5	IRG Rapporteur (Dr. Lu Qin)	
	<i>To take note of and act upon the following items.</i>	
a.	<p><i>M47.32 (CJK Ext C2):</i> WG2 takes note of item 3 in document N2968 and authorizes IRG to start its deliberations regarding CJK Extension C2.</p>
