Remove sub-clause B.2 'List of combining and other characters not allowed in implementation level 2', including the description, note, and list.

## Page 1365, annex C.5 Identification of UTF-16

Replace first paragraph and list by the following:

When the escape sequences from ISO/IEC 2022 are used, the identification of UTF-16 shall be by the following designation sequence and note:

ESC 02/05 02/15 04/12  
UTF-16 with implementation level 3

NOTE – The following designation sequences: ESC 02/05 02/15 04/10 and ESC 02/05 02/15 04/11 used in previous versions of this standard to identify implementation levels 1 and 2 are deprecated.

## Page 1373, annex D.6 Identification of UTF-8

Replace first paragraph and list by the following:

When the escape sequences from ISO/IEC 2022 are used, the identification of UTF-8 shall be by following designation sequence:

ESC 02/05 02/15 04/09

UTF-8 with implementation level 3

NOTE – The following designation sequences: ESC 02/05 02/15 04/07 and ESC 02/05 02/15 04/08 used in previous versions of this standard to identify implementation levels 1 and 2 are deprecated.

## Page 1390, annex N.1 Methods of reference to character repertoires and their coding

In second paragraph, including the list, replace the adopted implementation level (1,2 or 3)' with the implementation level 3 (see clause 14)'

## Page 1390, annex N.2 Identification of ASN.1 character abstract syntaxes

Replace text after the first note with the following:

The first such arc following a 10646 arc identifies the implementation level, and is level-3 (3).

NOTE 2 – This version of the standard only specifies the implementation level 3. See clause 14. Other implementation levels and their respective identifications are deprecated.

The second such arc identifies the repertoire subset, and is either:

- all (0), or
- collections (1).

Arc (0) identifies the entire collection of characters specified in ISO/IEC 10646. No further arc follows this arc.

NOTE 3 – This collection includes private groups and planes, and is therefore not fully-defined. Its use without additional prior agreement is deprecated.

Arc (1) is followed by one or a sequence of further arcs, each of which is a collection number from annex A, in ascending numerical order. This sequence identifies the subset consisting of the collections whose numbers appear in the sequence.

NOTE 4 – As an example, the object identifier for the subset comprising the collections BASIC LATIN, LATIN-1 SUPPLEMENT, and MATHEMATICAL OPERATORS, at implementation level 3, is:

{iso standard 10646 0 level-3 (1) collections (1) 1 2 39}

ISO/IEC 8824 also specifies object descriptors corresponding to object identifier values. For each combination of arcs the corresponding object descriptors are as follows:

3 0 : "ISO 10646 level-3 unrestricted"

For a single collection with collection name "xxx".

3 1 : "ISO 10646 level-3 xxx"

For a repertoire comprising more than one collection, numbered m1, m2, etc.

3 1 : "ISO 10646 level-3 collections m1, m2, m3, .. "

NOTE 5 – All spaces are single spaces.

## Page 1379, Annex G

*Insert each of the new character name entries at the appropriate position, ordered alphabetically by the character name, in the list of character names in Annex G. These new names are provided in a machine-readable format that is accessible as a link to this document.*

*Click on this highlighted text to access the file containing the new names.*

*NOTE – The content is also available as a separate viewable file in the same file directory as this document. The file is named: "Am4names.txt".*
