

TITLE: Contact with Abkhaz community
SOURCE: Deborah Anderson, SEI, UC Berkeley (and USNB rep)
STATUS: Liaison contribution
ACTION: For consideration by WG2
DISTRIBUTION: ISO/IEC JTC1/SC2/WG2
DATE: 13 October 2008

This document is to acknowledge that I (and Michael Everson) have communicated with the Abkhaz community on the alternatives for PE with descender versus PE with hook. The discussion took place over email during the WG2 meeting #52 in Redmond, WA, in April 2008. The result was that the Abkhaz contacts agreed to the proposed characters in N3435R.

This completes AI-52-9.
