

TITLE: Request for Tangut font and mappings from N3577 to Amendment 7 repertoire
SOURCE: Deborah Anderson and Richard Cook, Script Encoding Initiative, UC Berkeley
STATUS: Liaison contribution
ACTION: For consideration by WG2
DISTRIBUTION: ISO/IEC JTC1/SC2/WG2
DATE: 4 March 2009

The revised Tangut document, N3577, may be acceptable in terms of the character repertoire and ordering changes. However, a careful review of the data is necessary, particularly as this is such a large set of characters. Hence we ask the proposal authors provide WG2 with the final font and mappings from N3577 to the repertoire in PDAM 7, N3547, in the format as given on p.16 ff. of N3577 as soon as possible. Only after such a study will it be possible to verify the data is correct, and support the repertoire as set out in this document.

Also, the proposal should cite earlier WG2 documents on Tangut to provide fuller background.
