Doc Type: Working Group Document
Title: New Character Collection "MIS-1" (Multilingual International Subset-1)
Source: German NB
Status: National Body Contribution
Action: For consideration by JTC1/SC2/WG2
Date: 2009-09-13

It is proposed to include into the next possible amendment for ISO/IEC 10646 a new character collection:

Character Collection 284: MIS-1 (Multilingual International Subset-1)

Add to the list in A.1 "Collections of coded graphic characters" the following entry after the entry #283:

284 MIS-1 see A.4.4 *

Add the following note to the end of A.4 (before A.4.1):

NOTE – The acronym MIS indicates Multilingual International Subset.

Add a new subclause A.4.4 (after A.4.3):

A.4.4 284 MIS-1 is specified by the following code positions and ranges thereof:

```
0020-007E   0246-0249   0300-0304   1E2E-1E73   2122
00A0-0180   024C-024F   0306-0311   1E76-1E99   2126
018F        0259        0313        1E9B        214D
0197        0268        0315        1E9E        215B-215E
019A-019B   0272        031B        1EA0-1EF9   2190-2193
019D-01A1   0275        0323-0329   200C        219A-219B
01AF-01B0   027C        032D-032E   2011        2212

```

The proposed character collection contains all characters which can be input on a keyboard by means of the current revision if ISO/IEC 9995-3 "Information Technology – Keyboard layouts for text and office systems – Part 3: Complementary layouts of the alphanumeric zone of the alphanumeric section".
This standard edition is currently a FDIS (by resolution 2009:34 of ISO/IEC JTC1/SC35, Saskatoon 2009-08-26) and will probably be published as ISO/IEC 9995-3:2010 .

The prior edition if ISO/IEC 9995-3 referred to the character collection 281 "MES-1", which exactly represented the set which could be input by means of that standard (when augmented by the Euro sign).
The current revision was extended to an international (rather than European) scope. Thus, it is proposed here to include the set which can be input by its means, reflecting the extended scope in its name.

By addition of the proposed character collection, the relation between ISO/IEC 10646 and ISO/IEC 9995-3 is maintained. (In fact, the table shown above is identical to the one presented in Annex A of the revised edition of the latter.)

Detailed information on the revision of ISO/IEC 9995-3 can be found on:
