

## Editorial Comment

Annex L - Guideline 11 on page 2108 has the following text:

-->

In these cases the customary name reflecting the most general use is given to the character. The customary name may be followed in the list of characters of a particular standard by the name in parentheses which this character has in the script specified by this particular standard.

### EXAMPLE

∩ UNDERTIE (Enotikon)

<--

The second sentence and the example should be changed to reflect the change away from parenthetical notation and correspond to the charts in the second edition. The chart / nameslist entry corresponding to the example at 203F has:

-->

203F ∩ UNDERTIE

= Greek enotikon

→ 2323 ∩ smile

<--
