

Title: Summary of repertoire for future amendment of ISO/IEC 10646:2011

Date: 2010-04-23

WG2/N3834

Source: Michel Suignard
Status: project editor
Action: For review by WG2 and UTC experts
Distribution: WG2 and UTC

Note

Status

This document presents a summary of all characters that constitute the tentative repertoire of the amendment 1 to ISO/IEC 10646:2011, with code positions, representative glyphs and character names. In this document, the names and code positions are shown as currently approved by WG2 for the text of the forthcoming ballot. The purpose of this document is to allow WG2 delegates to review the character names, code positions and glyphs and notify the editor if they differ from what was approved in the meeting. A separate ballot document will be submitted by the project editor after the meeting.

Manner of Presentation

The character names and code points shown are the same for Unicode and ISO/IEC 10646, including annotations.

In this document, the new characters are not shown in the context of the existing characters. The existing characters will be shown in the final ballot document or character names list. The occasional use of the word <reserved> in this draft is an artifact of the production process and should be ignored.

Information about the status of a character proposal in WG2 and UTC as well as other information about the proposal is presented in a marginal note. Where a proposal refers to characters that are not in a single range, the information is repeated as necessary. A series of \$\$\$\$ indicates the presence of an issue that needs to be resolved as part of synchronization. The WG2 document number for all proposals has been provided for reference, as well as the UTC document number.

Note to Reviewers

WG2 Reviewers, please use this document as an aid during disposition of ballot comments.
Despite best efforts there may be minor discrepancies in this document, particularly in terms of this summary and the status information printed in the margins.

Contents

This document lists 715 characters.

The following list shows all 25 blocks (existing or new) to which characters are proposed to be added, or which have been affected by other changes documented here.

Stretching operators

The following operators stretch based on the width of the text that is displayed below or above them.

- 1EEF0 محج ARABIC MATHEMATICAL OPERATOR MEEM
WITH HAH WITH TATWEEL
→ 2211 \sum n-ary summation
- used in Arabic mathematics to denote summation
 - stretched at the tatweel
- 1EEF1 حد ARABIC MATHEMATICAL OPERATOR HAH WITH
DAL
- used in Persian mathematics to denote limits
 - stretched between the hah and the dal
