

## **Title: Draft repertoire for PDAM1 of ISO/IEC 10646:2012 (3rd edition)**

**Date: 2010-10-08**

**L2/10-386 WG2/N3946**

Source: Michel Suignard, project editor

Status: Project Editor's summary of the character repertoire as result of changes in M57

Action: For review by WG2 and UTC experts

Distribution: WG2 and UTC

Replaces: N3891

### **Status**

This document presents a summary of all characters that constitute the tentative repertoire of the amendment 1 to ISO/IEC 10646:2011, with code positions, representative glyphs and character names. In this document, the names and code positions are shown as currently approved by WG2 for the text of a future ballot. In addition, this version of the document also includes names and code positions currently approved by UTC for future versions of the Unicode Standard as character encoding proposals. The purpose of this document is to allow WG2 delegates to review the character names, code positions and glyphs and notify the editor if they differ from what was approved in the meeting.

### **Manner of Presentation**

The character names and code points shown are the same for Unicode and ISO/IEC 10646, including annotations.

In this document, the new characters are not shown in the context of the existing characters. The existing characters will be shown in the final ballot document or character names list. The occasional use of the word <reserved> in this draft is an artifact of the production process and should be ignored.

Information about the status of a character proposal in WG2 and UTC as well as other information about the proposal is presented in a marginal note. Where a proposal refers to characters that are not in a single range, the information is repeated as necessary. A series of \$\$\$\$ indicates the presence of an issue that needs to be resolved as part of synchronization. The WG2 document number for all proposals has been provided for reference, as well as the UTC document number.

### **Note to Reviewers**

*Despite best efforts there may be minor discrepancies in this document, particularly in terms of this summary and the status information printed in the margins.*

### **Contents**

*This document lists 281 characters.*

The following list shows all 11 blocks (existing or new) to which characters are proposed to be added, or which have been affected by other changes documented here.
