**Doc Type: Working Group Document**

**Title: Proposal to encode two Greek modifier letters for Critical Apparatuses in the UCS**

**Source: Abteilung für Griechische und Lateinische Philologie der Ludwig-Maximilians-Universität München (Department of Greek and Latin Philology, Ludwig-Maximilians-University of Munich, Germany)**

**Authors: Martin Schrage, Karl Pentzlin**

**Status: Expert Contribution**

**Action: For consideration by JTC1/SC2/WG2 and UTC**

**Date: 2011-10-15**

*This document is based on an excerpt of WG2 N3913 and L2/10-358R (Proposal to encode Metrical Symbols and related characters), as it was decided to split that work and to propose the "related characters" separately by subject.*

## 1. Introduction

The critical apparatus of recent editions of classical Greek works uses a set of conventional signs and abbreviations.

While the constituents of most of these are already contained in Unicode, two of them, being raised Greek letters, are missing. They are subject of this proposal.

The provided evidence shows lists of the apparatus characters as well as excerpts of apparatuses from several works printed in the USA, the U.K., and Germany.

Text of critical apparatuses is subject to be stored in text databases, associated with the text pieces (verses, lines, or sentences) they refer to. The set of conventional signs used there, partly consisting of raised Latin or Greek letters, is well-defined and limited.

Thus, the use of these conventional signs is plain text, and they have to be encoded.

As they consists of well-defined pieces which are already encoded (with the exception of the two characters proposed here), it is advisable to use these pieces when storing the plain text (like it is practice to store "ch" as "c" + "h", even if the text language is one which considers "ch" as a single letter).

## 2. Encoding Considerations

The raised Greek letters are proposed to be placed in the GREEK EXTENDED block, to leave the gaps in the "Greek and Coptic" block for "real" Greek letters if such are still found.

For the letter proposed at U+1F16, the term LAMDA instead of LAMBDA is used in the name, according to the naming of 03BB GREEK SMALL LETTER LAMDA.

While the MODIFIER LETTER SMALL GREEK RHO occurs only paired with the already encoded U+1D5E MODIFIER LETTER SMALL GREEK GAMMA in the context of this proposal, it is proposed as a separate character, rather than proposing a RAISED GREEK SMALL GAMMA RHO in analogy to e.g. U+1F16A RAISED MD.

If this were done, it had to be discussed whether other conventional signs like <sup>uv</sup> ("ut videtur"), which perfectly can be represented by U+1D58 U+1D5B MODIFIER LETTER SMALL U/V, are to be encoded separately as units also in analogy.

### 3. Proposed Characters

#### ***Block: Greek Extended***

#### **Critical Apparatus symbols**

- λ U+1F16 MODIFIER LETTER SMALL GREEK LAMDA  
≈ <super> 03BB
- ρ U+1F17 MODIFIER LETTER SMALL GREEK RHO  
≈ <super> 03C1  
· usually used following U+1D5E modifier letter small greek gamma

#### **Properties:**

U+1F16 MODIFIER LETTER SMALL GREEK LAMDA;Lm;0;L;<super> 03BB;;;;N;;;;;  
U+1F17 MODIFIER LETTER SMALL GREEK RHO;Lm;0;L;<super> 03C1;;;;N;;;;;

## 5. Examples and Figures

The figures are numbered by the referenced work (consisting of the year of edition and the letter, as in the "references" list, followed by a hyphen the page number, and following by a second letter if more than one figure is taken from a page.

E.g.: "Fig. 1992a-42" means "See ref. [1992a], p.42").

**ISO/IEC JTC 1/SC 2/WG 2  
PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS  
FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646<sup>1</sup>**

**Please fill all the sections A, B and C below.**

Please read Principles and Procedures Document (P & P) from <http://www.dkuug.dk/JTC1/SC2/WG2/docs/principles.html> for guidelines and details before filling this form.

Please ensure you are using the latest Form from <http://www.dkuug.dk/JTC1/SC2/WG2/docs/summaryform.html>.

See also <http://www.dkuug.dk/JTC1/SC2/WG2/docs/roadmaps.html> for latest Roadmaps.

**A. Administrative**

1. Title: **Proposal to encode two Greek modifier letters for Critical Apparatuses in the UCS**
2. Requester's name: *Martin Schrage; Karl Pentzlin*
3. Requester type (Member body/Liaison/Individual contribution): *Expert Contribution*
4. Submission date: *2011-10-15*
5. Requester's reference (if applicable): *University of Munich, Germany (M. S.)*
6. Choose one of the following:
- This is a complete proposal:  Yes
- (or) More information will be provided later:

**B. Technical – General**

1. Choose one of the following:
- a. This proposal is for a new script (set of characters):  No
- Proposed name of script: \_\_\_\_\_
- b. The proposal is for addition of character(s) to an existing block:  Yes
- Name of the existing block: *Greek Extended*
2. Number of characters in proposal:  2
3. Proposed category (select one from below - see section 2.2 of P&P document):
- A-Contemporary  B.1-Specialized (small collection)  B.2-Specialized (large collection)
- C-Major extinct  D-Attested extinct  E-Minor extinct
- F-Archaic Hieroglyphic or Ideographic  G-Obscure or questionable usage symbols
4. Is a repertoire including character names provided?  Yes
- a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document?  Yes
- b. Are the character shapes attached in a legible form suitable for review?  Yes
5. Fonts related:
- a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publishing the standard? *The authors (if requested)*
- b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.): *The authors (if requested)*
6. References:
- a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?  Yes
- b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?  Yes
7. Special encoding issues:
- Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?  No

**8. Additional Information:**

Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <http://www.unicode.org> for such information on other scripts. Also see <http://www.unicode.org/Public/UNIDATA/UCD.html> and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.

<sup>1</sup> Form number: N3702-F (Original 1994-10-14; Revised 1995-01, 1995-04, 1996-04, 1996-08, 1999-03, 2001-05, 2001-09, 2003-11, 2005-01, 2005-09, 2005-10, 2007-03, 2008-05, 2009-11)

**C. Technical - Justification**

1. Has this proposal for addition of character(s) been submitted before?	Yes
If YES explain	<i>They are contained in WG2 N3913 = L2/10-358R and are separated here from its revision</i>
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?	Yes
If YES, with whom?	<i>One of the authors (M. S.) is a member of the scientific community himself</i>
If YES, available relevant documents:	<i>See text</i>
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included?	Yes
Reference:	<i>See text</i>
4. The context of use for the proposed characters (type of use; common or rare)	Common scientific
Reference:	<i>See text</i>
5. Are the proposed characters in current use by the user community?	Yes
If YES, where? Reference:	<i>See text</i>
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP?	Yes
If YES, is a rationale provided?	Yes
If YES, reference:	<i>To keep them in line with related characters</i>
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?	Yes
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence?	No
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?	No
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to an existing character?	No
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
11. Does the proposal include use of combining characters and/or use of composite sequences?	No
If YES, is a rationale for such use provided?	
If YES, reference:	
Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?	
If YES, reference:	
12. Does the proposal contain characters with any special properties such as control function or similar semantics?	No
If YES, describe in detail (include attachment if necessary)	
13. Does the proposal contain any Ideographic compatibility character(s)?	No
If YES, is the equivalent corresponding unified ideographic character(s) identified?	
If YES, reference:
