Title: Proposed Additions to ISO/IEC 10646

Source: U.S. National Body

Action: Forward to INCITS

This document describes additions to ISO/IEC 10646 that the U.S. National body would like to see integrated in the standard. The items in this category are considered mature enough for inclusion in the standard.

1. Warang Citi

The U.S. requests the addition of the 84 characters for the Warang Citi script, with glyphs, rationale, and properties as proposed in document WG2 N4259. The new Warang Citi characters appear in a new “Warang Citi” block to be located in the range U+118A0 -U+118FF.

2. Old Permic

The U.S. requests the addition of 43 characters, with glyphs, rationale, and properties as documented in WG2 N4263. The characters appear in a new “Old Permic” block located in the range U+10350-U+1037F.

3. Arabic Extended-A

The U.S. requests the addition of one character, U+08B2 ARABIC LETTER ZAIN WITH INVERTED V ABOVE, with glyph, rationale, and properties as documented in WG2 N4271.

4. Sharada

The U.S. requests the addition of one character, U+111CD SHARADA SUTRA MARK , with glyph, rationale, and properties as documented in WG2 N4269.

5. Variation Sequences

The U.S. requests the addition of 1002 variation sequences as listed in WG2 N4246-A.
