

**Title:** Request to reallocate some recently-approved Sharada characters  
**Author:** Anshuman Pandey (pandey@umich.edu)  
**Status:** Individual Contribution  
**Action:** For consideration by UTC and WG2  
**Date:** 2013-04-25

## 1 Introduction

This document requests the reallocation of five characters within the Sharada block that have been approved for inclusion in the Universal Character Set, but which are not yet formally encoded. The current code points of the characters and the requested reassignments are:

|                           | Current | Requested |
|---------------------------|---------|-----------|
| SHARADA CONTINUATION MARK | 111CE   | 111DD     |
| SHARADA HEADSTROKE        | 111DB   | 111DC     |
| SHARADA SIGN SIDDHAM      | 111DC   | 111DB     |
| SHARADA SECTION MARK-1    | 111DD   | 111DE     |
| SHARADA SECTION MARK-2    | 111DE   | 111DF     |

Enclosed are two sets of code charts and names lists. The set titled ‘Sharada - Current’ shows characters already encoded and those approved for inclusion, but not yet encoded, which are highlighted in yellow. The ‘Sharada - Requested’ set shows the desired reallocations, with the new locations highlighted in blue.

## 2 Justification

The current allocations for the aforementioned five characters cause disorganization in the Sharada block because characters that should be grouped together on account of similar function are scattered. Moreover, there are additional characters that will be proposed for encoding in the block and these should be contiguous to characters already approved for inclusion if they are found to be suitable for encoding.

The onus for the ‘misallocations’ falls upon the author of the proposals to encode the five characters, who is also the author of the present request. In the proposal to encode SHARADA SIGN SIDDHAM, the author suggested that the character be encoded at U+111DB (N4331 L2/12-318). However, in the proposal for SHARADA HEADSTROKE, the author inadvertently suggested that this character should also be encoded at U+111DB instead of U+111DC (N4337 L2/12-324). The proposal for SHARADA CONTINUATION MARK did not request a specific allocation, but suggested that the character be encoded in the 111Cx column (N4329 L2/12-319). The proposal for SHARADA SECTION MARK-1 and SHARADA SECTION MARK-2 suggested that these characters be encoded at U+111DD and U+111DE (N4338 L2/12-325).

Swapping the positions of SHARADA SIGN SIDDHAM and SHARADA HEADSTROKE would place SHARADA SIGN SIDDHAM at U+111DB (as originally intended), next to SHARADA EKAM (pending encoding at U+111DA),

so that these two head marks may be grouped together. Shifting SHARADA SECTION MARK-1 and SHARADA SECTION MARK-2 each one code point down would open up a spot in the final column at U+111DD, so that SHARADA CONTINUATION MARK may be placed next to SHARADA HEADSTROKE, both of which are typographic marks. Shifting SHARADA CONTINUATION MARK from column 111Cx to 111Dx opens up two spaces after SHARADA SUTRA MARK (U+111CD), which may be used for two signs that should be grouped with SHARADA SUTRA MARK as characters used in a mathematical treatise called the *Bakhshali Manuscript*.

The reallocation of the five characters as specified above will not affect the encoding for Sharada in the UCS. Rather, it will enhance the organization of the Sharada block and lead to the logical usage of the remaining two spaces in the block. Moreover, the reallocation will assist in establishing a more organized names list for Sharada. The author understands the burdens placed upon UTC and WG2 by the request to assign new code points to characters that have been approved and that are at advanced stages of ISO balloting. Nonetheless, it is hoped that the two standards bodies will approve the request based upon the benefits to be accrued by the reallocations.
